

Head: face

Drawn 8x actual size. Print at 100% (Actual size) on A4. The face prints straight on, so draw it as you want it seen.

Minifig sketch template · page 1 of 6

FACE
with suggested eyes and mouth

FACE
blank - same print area

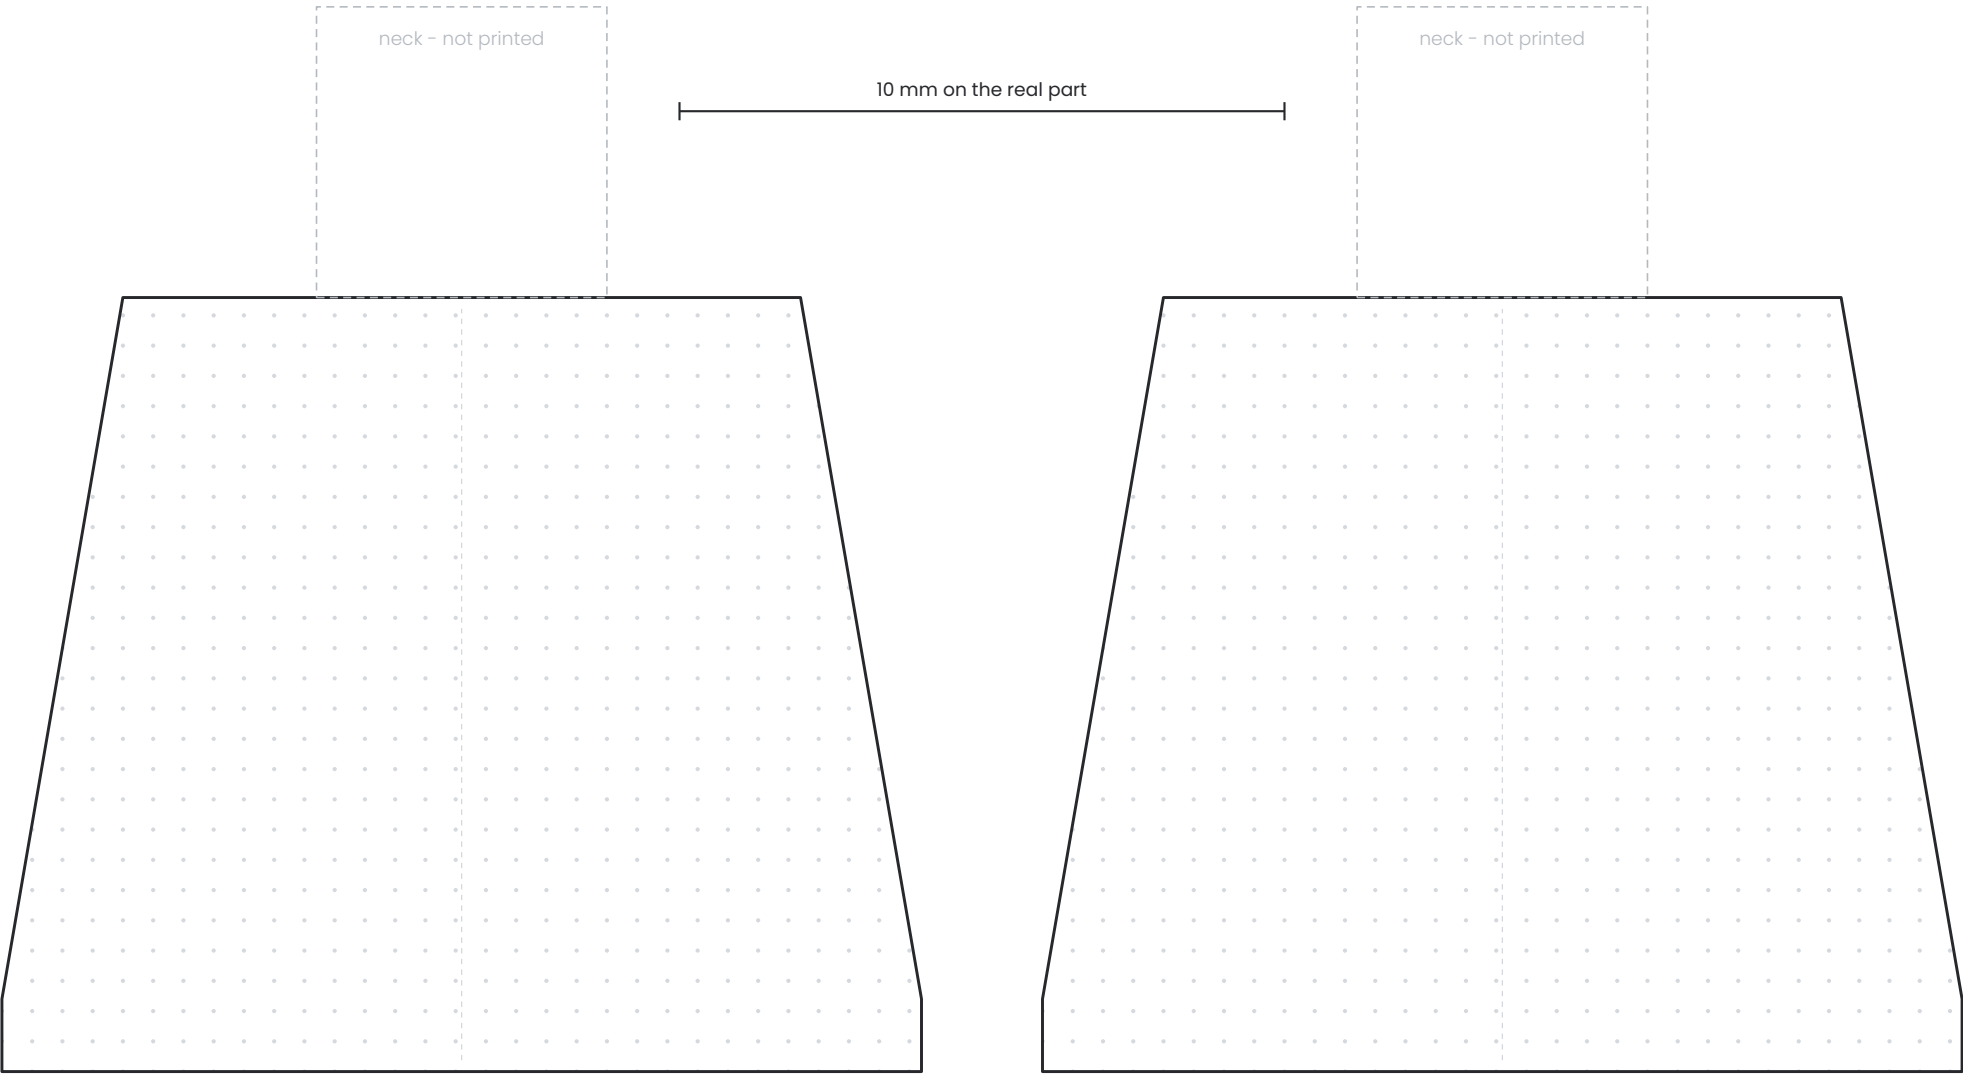

Solid box: the print area, 9.25 x 8.00 mm.

Dashed teal: **safe zone.** The head curves away towards its sides, so detail outside it prints squashed or soft.

Dashed grey: **eyes and mouth** where they sit on a face we've printed. A starting point - move them if your design needs to.

Torso: front and back

Drawn 8x actual size. Print at 100% (Actual size) on A4. Rough is fine.

FRONT

15.2 mm at the hips · 11.2 mm at the shoulders · 12.8 mm tall

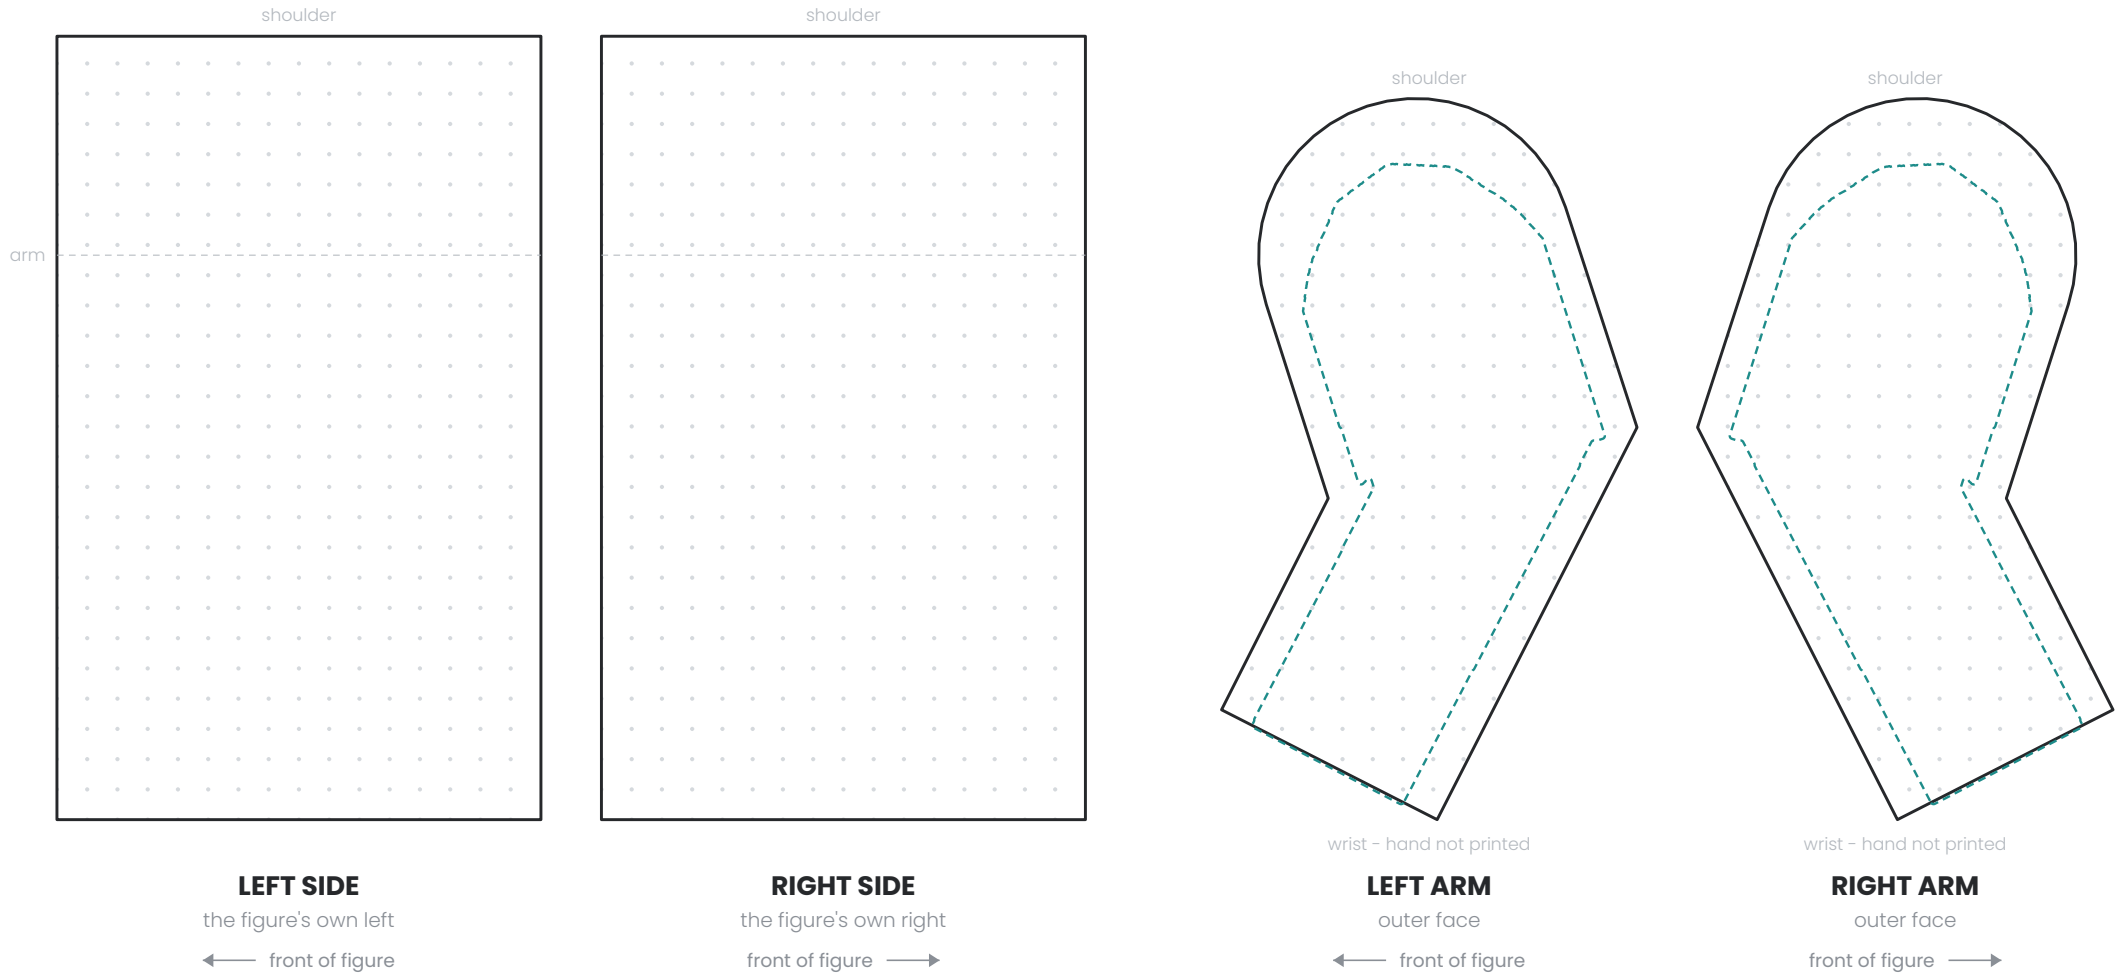

BACK

15.2 mm at the hips · 11.2 mm at the shoulders · 12.8 mm tall

All outlines 8x actual size, taken from a digital model of each part. Treat edges as a guide - we fit your design to the real part.

Torso sides and arms

8x actual size. Skip any face you don't want printed.

Torso sides: 8.0 mm deep x 12.9 mm long. The dashed line marks the arm socket - with the arms hanging down, they hide much of each side.

Arms: shoulder at the top, wrist at the bottom, elbow bend towards the front. The hands come off and aren't printed.

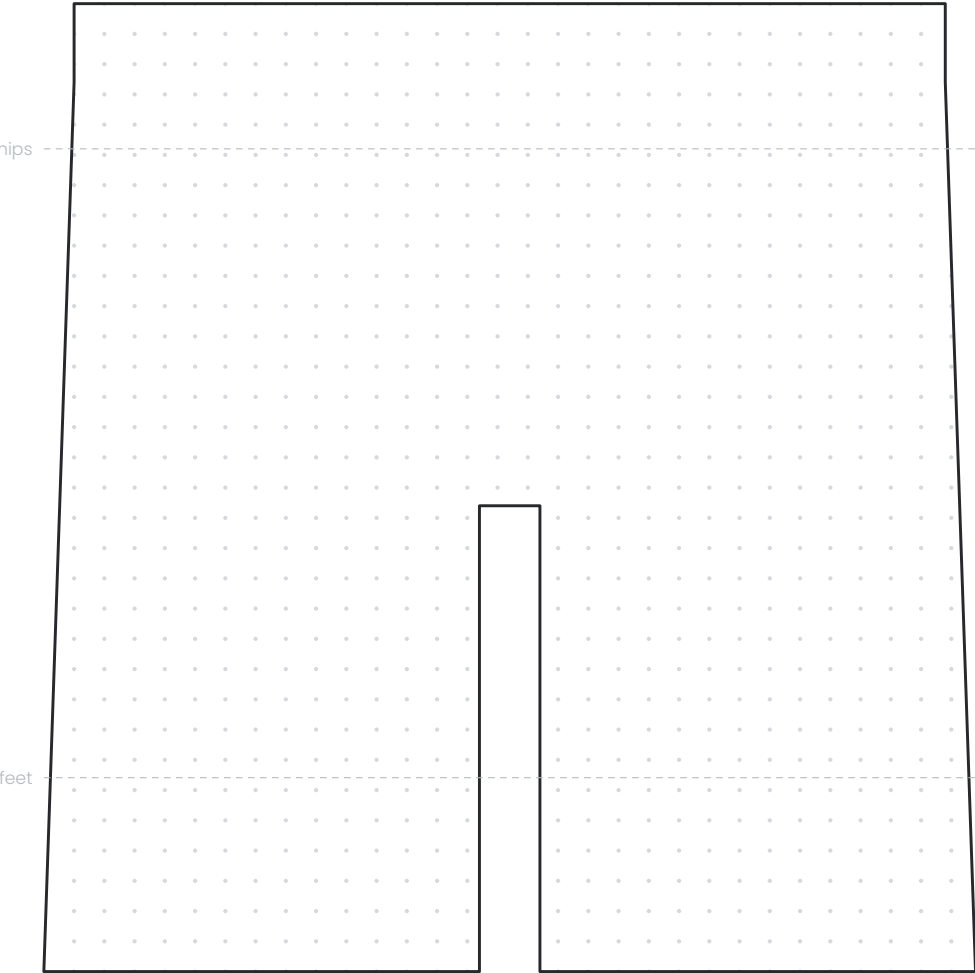

Dashed teal line = arm safe zone. Keep faces, words and fine detail inside it - outside, the arm curves away and designs print squashed or soft.

All outlines 8x actual size, taken from a digital model of each part. Treat edges as a guide - we fit your design to the real part.

Legs: front and back

8x actual size. Hips at the top, feet at the bottom.

FRONT

15.4 mm across at the feet · 16.0 mm tall

BACK

15.4 mm across at the feet · 16.0 mm tall

Leg sides, and everything at real size

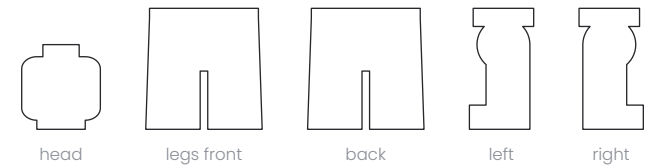

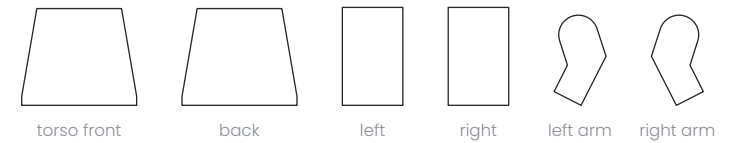

8x actual size. Toes point to the front of the figure.

Minifig sketch template · page 5 of 6

ACTUAL SIZE

This is what your design shrinks down to.

The leg sides are drawn with the hip block at the top.
The connectors above it go up inside the torso.

LEFT LEG SIDE

the figure's own left

← front of figure

RIGHT LEG SIDE

the figure's own right

front of figure →

Your details

One set of pages per figure. Send back only the pages you've drawn on.

Arms ☐ Left ☐ Right

Legs ☐ Front ☐ Back ☐ Left side ☐ Right side

Notes _____

GOOD TO KNOW

- 1 Sketch on the outlines and write the colours on or beside them. Rough is fine – we redraw it as print artwork and send you a proof before anything is printed.
- 2 Keep it bold. A 2 mm line on these pages is a quarter of a millimetre on the figure, so very fine lines and tiny text will blur into the colours around them.
- 3 Each face is printed separately, so a design that runs across an edge may not line up exactly. Treat each face as its own panel.
- 4 We print full colour plus white, so light designs on dark parts are fine.
- 5 On the face and arms, keep important detail inside the dashed teal safe zone. Both curve away towards their edges, so anything outside it prints squashed or soft.
- 6 The dashed grey eyes and mouth on the face page show where they sit on a face we've printed – a starting point, not a rule.
- 7 Only tick the faces you need. Each face is a separate print, so fewer faces costs less.
- 8 **Sending it back:** a phone photo or scan is fine (JPG, PNG or PDF). Drawing digitally? Vector is best (PDF, SVG, AI or EPS); otherwise a PNG on a transparent background at 720 dpi or more at actual size.
